

## Ultra-Fresh and Dust Mites

*“Allergies to dust mites are the sixth most important health problem in the world today.”*  
World Health Organization 1995

*“There is sufficient evidence of a causal relationship between dust mite allergen exposure and the development of asthma in susceptible children.”*  
National Academy of Sciences, 2000<sup>1</sup>

*“House dust mites are the major cause of perennial allergy in Britain.”*  
British Medical Journal<sup>2</sup>

Health experts around the world agree that allergies to dust mites are a very serious health problem today and Ultra-Fresh can help.

Ultra-Fresh treated articles create an inhospitable environment for dust mites. There will always be dust mites in the world but Ultra-Fresh can eliminate them from bedding, carpets, furniture and other areas in the home.

While Ultra-Fresh will not cure asthma. Ultra-Fresh treated articles are part of a general programmer of asthma control in the home. They are useful where more extreme measures may not be practical or desirable.

Example of articles that have been successfully treated with Ultra-Fresh against dust mites;
